Anpeco Design Company delivers quality software, hardware, and documentation on time, in budget, and consistently exceeding our customers' expectations.

What We Do

Anpeco Design Company engineers all love working in the technology area.   We are all professional and experienced developers with a long history of successful projects.

Special Areas of Expertise:

- Palm OS Applications
  - Our Lead Developer is a Palm OS Certified Developer
  - Treo Smartphone Applications
- Hardware Design
  - Battery powered devices
  - DSP devices
  - Audio devices
  - Sensing devices
  - SDIO cards
- Windows Mobile Application
  - Voice Recognition Apps
  - Audio Applications
  - Network Applications
- Windows Applications
  - C++
  - SQL
  - Network Applications
  - Audio & Video Applications

Anpeco Design Company

We are available for any software or electronic development project that you might need, no matter how small or how large.

We start by working with our customers to develop written requirements that let the customer know exactly what we are doing and how long it will take. We then share our work and ideas each step along the way, and we always provide first class documentation and manuals along with our projects.

If you have a great idea, let us help you turn your idea into a real product. It's what we love to do, and we are very good at doing it.

- Tom Harrah
President & CEO

Anpeco Design Company

Turning Ideas Into Reality

A Hi-Tech Engineering Services Company Specializing in Mobile Software and Hardware

Palm OS Application Development

Our engineers have over 15 years of combined experience doing Palm OS development, including many applications and several hardware accessories. Our lead engineer is a Palm OS Certified Developer.

A few of the things we are very good at:
- Audio Applications (record & playback)
- Treo network applications
- Native ARM code
- Hardware Interfacing
- Internal and VFS databases
- HotSync Conduits
- Web Interface applications
- Camera applications
- SMS applications

We are registered developers with PalmSource, Palm One, Tapwave, Symbol, Garmin, Sony, Kyocera, Samsung, and Aceeca.

Windows Application Development

Our engineers have over 25 years of combined experience developing Microsoft Windows applications.

A few of skills we have developed:
- Audio Applications
- Video Applications
- Email & FTP Applications
- Database Applications
- Web Interface Applications
- Web Services Applications
  - Weather, Stock, etc.
- Hardware Interface Applications
- Manufacturing Test Applications

Windows Mobile & Smartphone

We first started programming for the Pocket PC platform in 2001, and have remained up to date on this platform.

A few of our Windows Mobile Skills:
- Native C++ high-performance Applications
- Voice Recognition Applications
- Video Applications
- Email & FTP Applications
- Database Applications
- Web Services Applications
  - Weather, Stock, etc.
- Web Interface Applications

Hardware Design

Our engineers have over 50 years of combined experience doing electronic hardware design. Many of our designs have been mass produced both with-in the US and overseas.

We are experienced at designing hardware that is reliable, low cost, easy to manufacture and test, and easy to maintain.

Some of our designs include:
- Several custom MP3 players
- Digital voice recorders
- Voice Recognition devices
- Palm Accessories
- SDIO Sensor cards
- Test & measurement devices
- Digital PBX's for hotels and truck stops.
- Analog & digital telephony equipment
- Custom test equipment for both manufacturing and development
- Pre-paid calling card platforms
- Thermal Printer drivers
